Today, It was my first day I attended the spark deakin internship. I really enjoyed it as it was an amazing experience for me. The environment was very welcoming and the tutors were very nice. I learned many new things as I am very much interested in business and I was looking for an internship in which I can learn how to start a business. I learned some new concepts such as problem tree which I genuinely finds interesting as with the help of this problem tree a person can view the problem in a better way and can figure out the solution.

From this internship, I want to get more knowledge about how to start a business and what are the important things that needs to be taken care of when an individual is starting a business. Overall I had a very nice experience and I look forward to learn more in the upcoming weeks
